

Citing your image, sound or Video sources

Directions: Every time you get an image, sound or video from a source, you need to give credit. Make sure you copy and paste the URL under **the website address** column. Save it as object1, object 2, etc so that you know which order to place them in your presentation. To add another row, click on the tab key on your keyboard. Before saving the image, make sure it is at least 400 X 300 pixels. Objects could be images or video.
